CONTENTS

Special Issue: In honour of Alan G. Marshall
Edited by: Michael T. Bower

Foreword ix

Alan Marshall: A personal Foreword xi

Alan G. Marshall Biosketch xiii

Alan George Marshall: CURRICULUM VITAE xv

Alan G. Marshall: Publication list xix

Activation of protonated peptides and molecular ions of small molecules using heated filaments in Fourier-transform ion cyclotron resonance mass spectrometry
Richard L. Wong, Errol W. Robinson and Evan R. Williams (Berkeley, CA, USA) 1

Structural studies on protein O-fucosylation by electron capture dissociation
Michael Mormann, Boris Maček (Münster, Germany), Anne Gonzalez de Peredo, Jan Hofsteenge (Basel, Switzerland) and Jasna Peter-Katalinić (Münster, Germany) 11

Electron capture dissociation Fourier transform ion cyclotron resonance mass spectrometry of cyclodepsipeptides, branched peptides, and ε-peptides
Helen J. Cooper, Robert R. Hudgins and Alan G. Marshall (Tallahassee, FL, USA) 23

RNase mapping of intact nucleic acids by electrospray ionization Fourier transform ion cyclotron resonance mass spectrometry (ESI-FTICRMS) and ^{18}O labeling
Zhaojing Meng and Patrick A. Limbach (Cincinnati, OH, USA) 37

Electron capture dissociation of the disulfide bond—a quantum chemical model study
Einar Uggerud (Oslo, Norway) 45

Gas-phase reactions of lanthanide cations with alcohols
José M. Carretas, Joaquim Marçalo and António Pires de Matos (Sacavém, Portugal) 51

central to science

Abstracted/Contents in:
Chem. Abstr.; Curr. Contents, Phys. Chem. Earth Sci.;
Embase/excerpta Medica; INSPEC; Mass Spectrom. Bull.; PASCAL/CNRS

(CONTENTS CONTINUED)

A review of gas-phase H/D exchange experiments: the protonated arginine dimer and bradykinin nonapeptide systems
C. Lifshitz (Jerusalem, Israel) **63**

Chiral analyses of peptides by ion/molecule reactions
Gabriela Grigorean, Xin Cong and Carlito B. Lebrilla (Davis, CA, USA) **71**

Utility of accurate monoisotopic mass measurements to confidently identify lambda exonuclease generated single-stranded amplicons containing 7-deaza analogs by electrospray ionization FT-ICR mass spectrometry
Jennifer L. Frahm (Richmond, VA, and Rochester, MN, USA), Christopher J. Mason and David C. Muddiman (Rochester, MN, USA) **79**

Fragmentation energetics for angiotensin II and its analogs from time- and energy-resolved surface-induced dissociation studies
Julia Laskin (Richland, WA, USA), Thomas H. Bailey (Newark, DE, USA) and Jean H. Futrell (Richland, WA, USA) **89**

Comparing the gas-phase fragmentation reactions of protonated and radical cations of the tripeptides GXR
Sheena Wee, Richard A.J. O'Hair and W. David McFadyen (Melbourne, Australia) **101**

Rapid electron capture dissociation of mass-selectively accumulated oligodeoxynucleotide dications
Kristin N. Schultz and Kristina Håkansson (Ann Arbor, MI, USA) **123**

Considerations for electron capture dissociation efficiency in FTICR mass spectrometry
Michael V. Gorshkov (Moscow, Russia), Christophe D. Masselon (Richland, WA, USA), Eugene N. Nikolaev (Moscow, Russia), Harold R. Udseth, Ljiljana Paša-Tolić and Richard D. Smith (Richland, WA, USA) **131**

Chemical cross-linking of the urease complex from *Helicobacter pylori* and analysis by Fourier transform ion cyclotron resonance mass spectrometry and molecular modeling
Elisabet Carlsohn, Jonas Ångström (Göteborg, Sweden), Mark R. Emmett, Alan G. Marshall (Tallahassee, FL, USA) and Carol L. Nilsson (Göteborg, Sweden) **137**

Glycoproteomics of cerebrospinal fluid in neurodegenerative disease
Carina Sihlbom (Gothenburg, Sweden), Pia Davidsson (Mölndal, Sweden), Mark R. Emmett, Alan G. Marshall (Florida, and Tallahassee, FL, USA) and Carol L. Nilsson (Gothenburg, Sweden) **145**

Interference from multiple cations in MALDI–MS spectra of copolymers
Jacob M. Kaufman, Arwah J. Jaber, Michael J. Stump (Fayetteville, AR, USA), William J. Simonsick Jr. (Philadelphia, PA, USA) and Charles L. Wilkins (Fayetteville, AR, USA) **153**

The influence of spontaneous *m/z*-changes on the ion motion in an ion cyclotron resonance trap
Alexander Herlert and Lutz Schweikhard (Greifswald, Germany) **161**

On the double benzylic hydrogen migration in the molecular ion of *N*-(5-phenylvaleryl)-1-azacyclopentane-2-thione
H. Yamaoka, I. Kusagi (Osaka, Japan), K. Isa, Y. Maekawa (Fukui, Japan) and N.M.M. Nibbering (Amsterdam, The Netherlands) **171**

Strategies for automating top-down protein analysis with Q-FTICR MS
Steven M. Patrie, Dana E. Robinson, Fanyu Meng, Yi Du and Neil L. Kelleher (Urbana, IL, USA) **175**

Effect of ionization mode in the analysis of proteolytic protein digests
Paul M. Bigwarfe Jr. and Troy D. Wood (Buffalo, NY, USA) **185**

High pressure MALDI-FTMS: implications for proteomics
Bogdan A. Budnik, Susanne C. Moyer, Jason L. Pittman, Vera B. Ivleva, Ulf Sommer, Catherine E. Costello and Peter B. O'Connor (Boston, MA, USA) **203**

Comparison of peptide mass mapping and electron capture dissociation as assays for histone posttranslational modifications
Liwen Zhang and Michael A. Freitas (Columbus, OH, USA) **213**

Author index, vol. 234 ..... **227**

Subject index, vol. 234 ..... **229**
